MOON CAMP

@HOME

GUIDELINES

Moon Camp is an education project run in collaboration between ESA and the Airbus Foundation, in partnership with Autodesk.

→ Overview

In the future, to enable astronauts to stay on the Moon for long periods of time, new infrastructures must be developed to overcome important challenges. Such challenges include protection from radiation and meteorites, energy production, the extraction and recycling of water, food production and much more. The Moon Camp Challenge invites you to 3D design a full Moon base or parts of it. To learn how you can do it explore our challenges.

Moon Camp @Home is a non-competitive mission. All participants whose entries comply with the guidelines will receive a special participation certificate and their project will be shared on the Moon Camp online platform.

→ Timeline

Registrations are open from 12 May 2020 to 4 September 2020.

→ Who can participate?

Participation is open to individuals, virtual teams of young people aged up to 18 years old, and families. An adult must submit the project for minors.

→ How to submit the project?

1. The 3D model must be created exclusively using Autodesk® Tinkercad™. Submissions created in other software programs will not be accepted.
2. Projects must be submitted to the Moon Camp online platform: www.mooncampchallenge.org.
3. By submitting the project, the participant agrees that their project will be shared on the Moon Camp platform. Participants accept that ESA Education and partners have the right to use the entirety or parts of the project for outreach and education purposes.
4. Submissions must include: a short paragraph description of the project written in English; at least one screen capture of the 3D model as a .JPG or .PNG; and the public link to the Tinkercad project (see how to share your public link: <https://mooncampchallenge.org/how-to-share-a-public-link-with-tinkercad/>).
5. ESA and Airbus Foundation, at their sole discretion, reserve the right to disqualify submissions that do not follow the guidelines, or that contain messages, which are deemed inappropriate or inadequate for the audience.

→ Questions

For any questions, consult the **Moon Camp Challenge website** www.mooncampchallenge.org or send an email to moon.camp@esa.int.
